LOCATION: G002 Hesterberg Hall, MTU Forestry building

COST: FREE *Enjoy coffee, dessert, and facilitated discussion*

**Rethinking the Links Between Population & Environment:
Moving Towards a More Hopeful Future**

Dr. Betsy Hartmann will present:

In the era of climate change, how can we create new relationships between people and nature that promote peace, and social and environmental justice? Join the discussion!

Betsy Hartmann is professor emerita of development studies and senior policy analyst of the Population and Development Program at Hampshire College in Amherst, MA. Her research, writing, teaching and lecturing focus on the intersections between population, migration, environment and security issues.

Cosponsored by Lake Superior Stewardship Initiative, Michigan Tech Center for Water & Society, Keweenaw Unitarian Universalist Fellowship, Michigan Tech Dept. of Social Sciences, and the Keweenaw Land Trust
